Subject: **Europe South Africa Service - SA ECS Northbound Schedule Changes**

Dear Valued Clients,

We are pleased to inform you that the seasonal bad weather period in the Cape Town and Western Cape area has passed and the operational situation in the port of Cape Town has improved over the last few weeks. Therefore, we will now be able to re-instate the northbound calls both in Coega (Port Elizabeth) and Algeciras and at the same time very importantly maintain the schedule reliability and overall integrity, in particular the scheduled arrival times into the European ports.

For your containers to all Mediterranean and Iberian Peninsula ports, the Algeciras NB call will be re-instated as from MV Santa Ursula voy. 974/211N with eta Algeciras 7th May.

Whereas for your exports from Port Elizabeth and East London we will be including a call at Coega (NCT) also on the northbound voyage as from MV Akadimos voy. 980/211N (09th/10th May)

With the re-instatement of these port calls into our northbound schedule and the resulting substantial improvements in respective transit times we trust this is seen a clear indication of our commitment to always provide you with the best and most reliable weekly service from South Africa to Europe.

For further details please refer to our online schedules <http://www.dal.biz> or contact our local DAL office or representation.

Kind Regards,
DAL Trade Management
